

What is Asha AI Bot?

Asha is an intelligent chatbot designed specifically for women to help them find jobs, events, and mentorship opportunities via the JobsForHer Foundation platform. It's ethical, privacy-respecting, and delivers real-time information.

How to Use Asha

1. Access the Chatbot:
 - Visit the JobsForHer platform or the external landing page where Asha is embedded.
 - No login is needed! Directly start chatting.
2. Start a Conversation:
 - Type in queries like:
 - "Find me jobs in Bangalore."
 - "Are there any mentorship programs available?"
 - "Tell me about upcoming career events."
 - Asha will understand the context even if you ask follow-up questions!
3. Get Personalized Recommendations:
 - Asha dynamically fetches:
 - Latest job listings
 - Event details
 - Mentorship programs
 - Everything is women-focused and updated in real-time.
4. Ethical & Bias-Free Interaction:

- If any inappropriate or biased query is detected, Asha will redirect or rephrase the conversation politely.
5. Privacy First:
- No personal data is stored.
 - Entirely session-based communication.
6. Feedback:
- You can report issues or give feedback directly in the chat if any information feels wrong or biased.

Future Enhancements for Asha AI Bot

- **Multilingual Support:** Enable regional and global languages.
